Objective

Junior Flutter Developer with **1 year of self-learning and project development experience** in **Dart** and **cross-platform mobile app development**, including **deploying full-stack mobile applications** using **Flutter, Firebase, and REST APIs**.
Proficient in implementing **Clean Architecture** and **MVVM design patterns** for building **scalable and maintainable codebases**.
Successfully developed and published **production-ready applications** featuring advanced **state management solutions** such as **Provider, Riverpod, GetX, and BLoC**.
Strong **problem-solving skills** with a passion for delivering **user-focused, high-performance mobile solutions**.

Technical Skills

(Flutter SDK & Dart Language)

Cross-Platform Mobile App Development

State Management — ***Provider, Riverpod, Bloc***

Backend & APIS — ***RESTful API Integration, Firebase Integration (Auth, Firestore, Realtime Database)***

UI Development — ***Material Widgets, Cupertino Widgets, Responsive UI, Adaptive UI***

Tools & Practices — ***Git, GitHub, Clean Architecture MVVM, JSON Parsing***

Project

Found You AI — AI-Powered Attendance Management System -

- Implemented AI-based face detection using **Google ML** Kit for automated and accurate attendance tracking
- Built a real-time dashboard with analytics to monitor attendance trends and worker activity
- Developed a scalable backend using **Node.js**, Express, and **MongoDB** with secure **JWT authentication**
- Designed admin features including worker management, attendance logs, and payout tracking

Construction Management App (Flutter + Node.js + MongoDB + BLoC)

- Developed a **full-stack cross-platform application** to manage construction projects, trackmaterial inventory, sales, and purchases
- Designed **RESTful APIs** using **Node.js** and Express with **MongoDB**, and managed complexfrontend state using the **BLoC** pattern
- Built modules for labor tracking (contractors & daily wages), construction progress mon-itoring, and automated tax/discount calculations
- Integrated **Google ML** Kit for document scanning, **Cloudinary** for invoice storage, and **Firebase** Google Sign-In

Recipe App (Flutter + REST API + Provider)

- Integrated TheMealDB API for meals and categories
- Managed application state using Provider
- Added Lottie animations and responsive UI

Experience

FLUTTER DEVELOPER, *Eqsoft business and solutions* 12/2025 – 03/2026

- Flutter and Dart development for billing and business systems
- Implemented CGST / SGST tax calculation and consolidation logic
- REST API integration and data binding
- Bug fixing and performance optimization in production code

JUNIOR FLUTTER DEVELOPER, *Skillpark kochi* 03/2025 – 11/2025

- Proficient in Dart & Flutter SDK for cross-platform app development
- Built Flutter apps from scratch in fast-paced, collaborative environments
- Integrated REST APIs and Firebase (Auth, Firestore, Realtime DB)
- Used Git/GitHub for version control, collaboration, and code reviews
- Experienced in state management: Provider, with knowledge of Riverpod & BLOC
- Focused on mobile UI/UX design: clean, responsive, and user-friendly

Education

B.sc Physics, *University of Calicut* 2019 – 2022

Higher secondary, *Govt HSS Pattikad* 2017 – 2019

SSLC, *St. Thomas HSS Thope, Thrissur* 2016

Language

- English
- Malayalam
- Tamil
